## Traffic Simulation Software

## Free Webinar: Introduction to Traffic Simulation Using TransModeler 6

Caliper Corporation is excited to offer a two-part webinar on traffic simulation with TransModeler. The webinar will introduce TransModeler 6 – the most recently released and most ground-breaking version of TransModeler yet – to current users and highlight TransModeler basics to those seeing TransModeler for the first time.

In Part 1, we will describe the features that make TransModeler the most capable, comprehensive, and cost-effective tool for all the things traffic planners and engineers routinely do. You will learn why TransModeler is:

- A superior microscopic traffic simulator for conventional and alternative geometric designs
- A complement to highway capacity analysis with HCS-to-TransModeler integration
- A full-service Traffic Impact Analysis tool
- A powerful engine for traffic signal timing optimization
- A public involvement tool with built-in 3D visualization

**Tuesday, December 8, 2020**

**1:00 p.m. – 2:30 p.m. EST**

**Registration** <https://attendee.gotowebinar.com/register/4995765632086692112>

Part 2, Advanced Traffic Simulation Using TransModeler 6, will be held in early 2021.
